Walk for Health!!

Our annual 5k race and fun walk is our primary fundraiser.

Please join us as we work toward connecting the Susquehanna Warrior Trail (SWT) with other trail systems. Our current project and goal is to finish the Trail from Canal Park in West Nanticoke to the Plymouth Levee System. This 3-mile extension will connect the SWT with other trails leading into Wilkes-Barre. SWT is truly a community asset and an important component in connecting the developing trail systems in central Pennsylvania to trails that stretch into Philadelphia, inviting other local communities to work with us towards regional success. We are an integral part of this vision. The current 12 1/2 mile section now provides hikers, bikers, and cross-country skiers a safe and scenic outlet for healthy exercise much needed to offset our sedentary lifestyles. It will be awesome to connect with other trails and provide greater recreational opportunities! SWT has no paid staff and is maintained entirely through the cooperative efforts of volunteers from local businesses, schools, and scout groups, as well as interested individuals.
